projectfacts

The Multi-Projectmanagement-System

Successful projects don't just happen...

Successful projects are not a matter of chance. They result from systematic, real-time planning, implementation and control. The significance of these success factors increases with the number and size of your projects. projectfacts provides all the functions you need for professional project realization – fast, user-friendly, and easy to handle. You can keep an overview of all your projects and guide each project to a successful conclusion.

www.projectfacts.com

You have everything under control!

- ✓ Professional time recording and cost input with worldwide access
- ✓ Project overview with 'traffic light' function and early-warning system
- ✓ Project management with tasks, milestones and priorities
- ✓ Overview of your company's income and expenses
- ✓ High-performance reporting for strategic planning and business area planning
- ✓ Resources, travel expenses, illness overview and holiday planning

And all of this at a reasonable price, easy to use, and individually tailored to your personal requirements.

What is projectfacts?

projectfacts is a web-based time and project control system for managing companies that work on a project-oriented basis and want to know the current status of their operations and their individual projects at all times. Therefore all times, incomes and expenses can be related to the appropriate customers, projects and cost centers.

The system is web-based and can be used with any desired number of projects or employees. You can use the permissions system to specify in detail who is permitted to see or change specific items in the system. The user-friendly operator interface ensures a fast, perceptible reduction in the everyday affairs and control processes.

How does projectfacts work?

projectfacts is a multi project management system that uses modern Web 2.0 technologies to expand the scope of traditional project management methods. For example, project times and costs are entered directly by the persons who perform the tasks. You can use projectfacts to combine hard data such as times, budgets and expenses with qualitative information such as extraordinary events, feedback and status reports. The objective is to obtain a picture of all the projects that is as current and realistic as possible.

Why does projectfacts lead to business success?

Success in business is the result of active decisions based on current, accurate information.

The following questions can be answered immediately with projectfacts, available any time:

- ✓ Which projects are presently in a critical situation?
- ✓ How much progress has a particular project made?
- ✓ Which employee has worked on a particular project, and with how much effort?
- ✓ Who are our best customers?
- ✓ What is the marginal income of a particular project or employee?
- ✓ What is our anticipated revenue for next year?
- ✓ How much do we expend on customer support or development?
- ✓ Which of our business areas are profitable?
